ABOUT ME

Motivated and detail-oriented professional with a passion for building innovative, scalable solutions. Proven ability to design, develop, and maintain websites and applications, with a strong foundation in web development technologies such as HTML, CSS, JavaScript, and PHP. Skilled in both frontend and backend development, leveraging frameworks like Bootstrap and Laravel to create dynamic, responsive websites. Adept at problem-solving, debugging, and continuously learning new technologies to enhance technical expertise. Seeking opportunities to apply programming knowledge, collaborate with development teams, and gain hands-on experience in building cutting-edge software solutions.

Driven by a passion for coding and a commitment to creating impactful digital solutions. Eager to contribute to innovative projects and continue expanding skills in web development and software engineering.
